

# **Productivity & Chore Management App**

## **Complete Product Requirement & App Flow Document**

---

### **1. Project Overview**

#### **App Name Ideas**

**enbridge**

---

### **2. Problem Statement**

Students often struggle with:

- Managing daily chores and studies together
- Completing assignments on time
- Maintaining routines consistently
- Avoiding procrastination
- Staying disciplined
- Balancing academics, gym, sleep, and personal life
- Remembering tasks and deadlines
- Feeling overwhelmed due to poor organization

Most existing productivity apps are either:

- Too complicated
- Too corporate-focused
- Not designed for students
- Not emotionally engaging
- Missing motivation and habit-building systems

This app solves these issues using:

- Smart task management
- AI assistance
- Habit building
- Focus systems
- Gamification
- Student-friendly UI
- Emotional productivity tracking

---

### 3. Vision Statement

To build a smart student productivity ecosystem that helps students become disciplined, organized, and consistent in both academics and personal life.

---

### 4. Target Audience

#### Primary Users

- College students
- School students
- Hostel students
- Competitive exam aspirants

#### Secondary Users

- Working students
  - Freelancers
  - Young professionals
- 

### 5. Core Features

#### Essential Features

1. Daily Task Management
  2. Chore Tracking
  3. Smart Reminders
  4. Focus Timer
  5. Habit Tracking
  6. Daily Progress Dashboard
  7. Streak System
  8. Analytics
  9. Calendar Integration
  10. AI Productivity Assistant
- 

### 6. User Flow

#### COMPLETE APP FLOW

## 6.1 Splash Screen

### Purpose

- Branding
- Smooth app opening experience

### Components

- App logo
- Animated loading
- Motivational quote/tagline

### Example

"Small progress every day leads to big results."

### Flow

Splash Screen → Onboarding

---

## 6.2 Onboarding Flow

### Screen 1 — Welcome

#### Text

"Your daily productivity partner built for students."

#### Buttons

- Get Started
  - Skip
- 

### Screen 2 — Identify User Problems

#### Questions

- Do you procrastinate?
- Do you forget assignments?
- Do chores interrupt your study schedule?
- Do you struggle with consistency?

#### Goal

Create emotional connection.

---

### Screen 3 — Goal Selection

## **User Selects Goals**

- Better study routine
  - Gym consistency
  - Wake up early
  - Complete assignments
  - Reduce distractions
  - Better sleep cycle
  - Complete daily chores
  - Improve discipline
- 

## **Screen 4 — Schedule Setup**

### **Inputs**

- Wake-up time
- Sleep time
- College timing
- Study hours
- Gym timing
- Free time slots

### **Purpose**

Generate smart routines.

---

## **Screen 5 — Notifications Permission**

### **Ask Permissions**

- Notifications
  - Alarm access
  - Calendar sync
- 

## **Screen 6 — Account Setup**

### **Login Options**

- Google Login
- Email Login

- Guest Mode

## Flow

Onboarding → Dashboard

---

## 6.3 Dashboard/Home Screen

### Purpose

Central productivity control center.

---

### Top Navigation

#### Components

- Greeting message
- User profile image
- Productivity score
- Current streak

#### Example

"Good Morning, debangshu"

---

### Daily Progress Section

#### Components

- Circular progress bar
- Tasks completed
- Remaining tasks
- Daily percentage

#### Example

8/12 tasks completed

---

### Timeline Section

#### Daily Timeline Example

| Time | Task |
|------|------|
|------|------|

|         |         |
|---------|---------|
| 6:30 AM | Wake up |
|---------|---------|

| Time | Task |
|------|------|
|------|------|

|         |     |
|---------|-----|
| 7:00 AM | Gym |
|---------|-----|

|         |         |
|---------|---------|
| 9:00 AM | College |
|---------|---------|

|         |               |
|---------|---------------|
| 5:00 PM | Study Session |
|---------|---------------|

|         |            |
|---------|------------|
| 8:00 PM | Assignment |
|---------|------------|

|          |       |
|----------|-------|
| 10:30 PM | Sleep |
|----------|-------|

#### Task States

- Pending
- In Progress
- Completed
- Missed

---

#### Quick Actions

##### Floating Action Button (+)

##### Options

- Add Task
- Add Chore
- Start Focus Session
- Add Habit
- Quick Reminder

---

## 6.4 Add Task Flow

### Step 1 — Task Details

#### Fields

- Task title
- Description
- Subject/category
- Notes

#### Categories

- Study

- Personal
  - Chores
  - Health
  - Gym
  - Exams
  - Projects
- 

## **Step 2 — Scheduling**

### **User Sets**

- Date
- Start time
- Deadline
- Duration

### **Recurring Options**

- Daily
  - Weekly
  - Monthly
  - Custom
- 

## **Step 3 — Priority**

### **Levels**

- Low
  - Medium
  - High
  - Critical
- 

## **Step 4 — Reminder Setup**

### **Reminder Options**

- 10 mins before
- 30 mins before
- 1 hour before

- Smart Reminder
- 

## **Step 5 — Save**

### **Result**

Task appears in dashboard timeline.

---

## **6.5 Smart Reminder System**

### **Reminder Types**

#### **Gentle Reminder**

"Your study session starts in 15 minutes."

#### **Motivation Reminder**

"Small progress is still progress."

#### **Urgency Reminder**

"3 important tasks are pending today."

---

### **AI Reminder Logic**

#### **If User Ignores Tasks**

System:

- Increases reminder priority
- Breaks tasks into smaller actions
- Suggests easier starting points

#### **Example**

Instead of:

"Complete Assignment"

App Suggests:

1. Open laptop
  2. Read questions
  3. Solve Q1
  4. Continue
- 

## **6.6 Focus Mode**

## **Purpose**

Help users avoid distractions.

---

## **Features**

- Minimal UI
  - Pomodoro timer
  - Background sounds
  - Motivational quotes
  - Full-screen focus mode
  - Distraction blocker
- 

## **Buttons**

- Start
  - Pause
  - Complete
  - Extend Session
- 

## **Focus Statistics**

Track:

- Focus time
  - Break time
  - Sessions completed
  - Productivity score
- 

## **6.7 Task Completion Flow**

### **Completion Experience**

#### **Animations**

- Confetti
- Sound effect
- XP gained

#### **Example**

+20 Discipline XP

---

## **6.8 Gamification System**

### **User Rewards**

#### **XP System**

Earn XP by:

- Completing tasks
  - Maintaining streaks
  - Finishing focus sessions
  - Waking up on time
- 

#### **Levels**

Example:

- Level 1: Beginner
  - Level 5: Consistent
  - Level 10: Discipline Master
- 

#### **Badges**

Examples:

- Early Bird Badge
  - 7-Day Streak Badge
  - Study Beast Badge
  - Gym Warrior Badge
  - No Procrastination Badge
- 

#### **Coins System**

Coins can unlock:

- Themes
- App avatars
- Wallpapers
- Productivity effects

---

## 6.9 Daily Review System

### Night Summary

#### Display

- Tasks completed
- Missed tasks
- Total focus time
- Productivity score

#### Example

Tasks Completed: 9

Focus Time: 4h 20m

Productivity Score: 82%

---

## Mood Tracking

### User Selects Mood

- Amazing
- Good
- Okay
- Tired
- Burned Out

#### Purpose

Track emotional productivity.

---

## 6.10 Weekly Analytics

### Graphs & Reports

#### Show

- Weekly consistency
- Focus hours
- Tasks completed
- Missed tasks
- Sleep trends
- Study time

- Most productive hours
- 

### **Insights**

Examples:

- "You focus better in evenings."
  - "Monday was your most productive day."
  - "Your streak improved by 20%."
- 

## **6.11 AI Productivity Assistant**

### **Features**

Users can ask:

- Plan my day
  - Help me study
  - Create exam routine
  - Break this task into smaller tasks
  - How do I stop procrastinating?
- 

### **AI Outputs**

- Smart schedules
  - Study plans
  - Productivity advice
  - Time allocation
  - Recovery routines
- 

## **6.12 Emergency Recovery Mode**

### **Trigger Conditions**

- Too many pending tasks
  - Long inactivity
  - User overwhelmed
- 

### **Recovery Features**

- Show only top 3 tasks
- Simplified UI
- Stress reduction messages
- Micro-task system

### **Example**

"Let's just finish one small task first."

---

## **6.13 Social Features (Optional)**

### **Features**

- Add friends
  - Share streaks
  - Compete in challenges
  - Study rooms
  - Group productivity goals
- 

## **6.14 End-of-Day Reset**

### **Midnight Actions**

- Reset daily checklist
  - Carry unfinished tasks
  - Generate tomorrow's schedule
  - Refresh streak calculations
- 

## **7. App Screens List**

### **Core Screens**

1. Splash Screen
2. Onboarding
3. Login/Register
4. Dashboard
5. Add Task
6. Focus Mode
7. Analytics

8. AI Assistant
  9. Rewards Page
  10. Habit Tracker
  11. Profile Page
  12. Settings
  13. Calendar View
  14. Notification Center
  15. Recovery Mode
- 

## **8. UI/UX Design Guidelines**

### **Design Style**

- Minimalistic
  - Clean
  - Modern
  - Student-friendly
  - Smooth animations
- 

### **Recommended Colors**

#### **Light Mode**

- Soft blue
- White
- Purple accents

#### **Dark Mode**

- Dark gray
  - Purple glow accents
  - Neon highlights
- 

### **UI Components**

- Cards
- Progress rings
- Smooth charts

- Floating buttons
  - Minimal navigation
  - Bottom navigation bar
- 

## **9. Technical Architecture**

### **Frontend**

#### **Recommended Tech Stack**

##### **Mobile App**

- Flutter  
OR
- React Native

##### **UI Libraries**

- Material UI
  - Tailwind
  - ShadCN-inspired design system
- 

### **Backend**

#### **Recommended**

- Node.js
  - Express.js
  - Firebase
- 

### **Database**

#### **Options**

- MongoDB
  - Firebase Firestore
  - PostgreSQL
- 

### **Authentication**

#### **Methods**

- Google OAuth

- Email & Password
  - OTP Login
- 

## Notifications

### Services

- Firebase Cloud Messaging (FCM)
  - OneSignal
- 

## AI Features

### Integrations

- OpenAI API
  - Gemini API
- 

## 10. Database Structure

### Users Collection

Fields:

- User ID
  - Name
  - Email
  - Profile Image
  - Productivity Score
  - Streak Count
  - Settings
- 

### Tasks Collection

Fields:

- Task ID
- User ID
- Task Name
- Description
- Category

- Deadline
  - Priority
  - Status
  - Reminder Time
- 

### **Habit Collection**

Fields:

- Habit Name
  - Frequency
  - Completion History
  - Current Streak
- 

### **Analytics Collection**

Fields:

- Daily Productivity
  - Focus Hours
  - Tasks Completed
  - Mood Logs
- 

## **11. Notification Logic**

### **Smart Notification Conditions**

#### **If User Misses Morning Routine**

Send:

"A fresh start can still begin now."

---

#### **If User Completes Many Tasks**

Send:

"Amazing consistency today. Keep going!"

---

#### **If User Is Inactive**

Send:

"Start with just one small task."

---

## **12. Monetization Plan**

### **Free Version**

- Basic tasks
- Focus timer
- Daily reminders
- Analytics

---

### **Premium Version**

- AI planning
  - Advanced analytics
  - Unlimited habits
  - Smart productivity reports
  - Premium themes
  - Deep focus insights
- 

## **13. MVP (Minimum Viable Product)**

### **Features for First Launch**

- Login/Register
  - Dashboard
  - Task creation
  - Notifications
  - Focus timer
  - Habit tracking
  - Daily analytics
  - Streak system
- 

### **Features to Add Later**

- AI assistant
- Social features
- Recovery mode

- Voice assistant
  - OCR assignment scanner
  - AI-generated schedules
- 

## **14. Future Expansion Ideas**

### **Advanced Features**

- AI exam planner
  - Mental health tracking
  - Study room video sessions
  - College timetable sync
  - Smart wearable integration
  - Sleep monitoring
  - Smart assistant chatbot
- 

## **15. Marketing Strategy**

### **Target Platforms**

- Instagram
  - LinkedIn
  - YouTube Shorts
  - College communities
  - Student influencers
- 

### **Launch Strategy**

1. Build MVP
  2. Test with students
  3. Collect feedback
  4. Improve UI/UX
  5. Launch beta version
  6. Promote through reels and student pages
- 

## **16. Competitive Advantage**

## Why This App Is Different

Unlike generic productivity apps, this app:

- Understands student lifestyle
  - Combines chores + studies
  - Uses emotional productivity tracking
  - Includes AI assistance
  - Uses gamification deeply
  - Detects procrastination
  - Helps users recover from burnout
- 

## 17. Example Daily User Journey

### Morning

- Wake-up reminder
- Morning routine checklist
- Gym reminder

### Afternoon

- College schedule
- Assignment reminders
- Focus sessions

### Evening

- Study blocks
- Habit tracking
- Productivity score updates

### Night

- Daily review
  - Mood tracking
  - Tomorrow planning
- 

## 18. Security & Privacy

### Important Measures

- Encrypted user data

- Secure authentication
  - Private productivity analytics
  - Cloud backups
  - GDPR-compliant data handling
- 

## **19. Final Product Goal**

The app should not only manage tasks.  
It should become:

- A discipline partner
  - A student life manager
  - A motivation system
  - A habit-building ecosystem
  - A recovery tool during stressful periods
- 

## **20. Universal Expansion — App for Everyone**

### **Expanded Vision**

The app should evolve from a student productivity app into a universal life management ecosystem that can be used by:

- Students
- Working professionals
- Freelancers
- Entrepreneurs
- Parents
- Teachers
- Fitness enthusiasts
- Creators
- Elderly users
- Neurodivergent users
- Teams and organizations

The platform should adapt itself based on the user's lifestyle, goals, and routines.

---

## **21. Universal User Onboarding**

## **During Signup**

The app asks:

**“Who are you?”**

Users select:

- Student
  - Employee
  - Entrepreneur
  - Freelancer
  - Parent
  - Teacher
  - Fitness-focused
  - Creator
  - Senior citizen
  - Other
- 

## **Adaptive Dashboard**

The UI changes according to the user type.

### **Example**

#### **Student Dashboard**

- Assignments
- Study planner
- Exams
- Focus sessions

#### **Employee Dashboard**

- Meetings
- Deadlines
- Work tasks
- Team reminders

#### **Parent Dashboard**

- Family tasks
- Grocery reminders

- Child schedules

### **Fitness Dashboard**

- Workout tracker
  - Meal plans
  - Sleep tracking
- 

## **22. Core Universal Features**

### **Life Management System**

#### **Features**

- Tasks
  - Habits
  - Calendar
  - Goals
  - Focus sessions
  - Mood tracking
  - AI planning
  - Smart reminders
  - Analytics
  - Daily routines
- 

## **23. AI Personalization Engine**

### **The app should learn:**

- User behavior
- Productivity hours
- Energy levels
- Sleep patterns
- Stress levels
- Task completion habits

### **Then automatically:**

- Adjust schedules
- Suggest routines

- Recommend breaks
  - Optimize productivity
- 

## **24. Accessibility Features**

### **Important Features**

- Voice control
  - Text-to-speech
  - Dyslexia-friendly fonts
  - High contrast mode
  - Large text mode
  - Offline mode
  - Multi-language support
  - Simple UI mode for elderly users
- 

## **25. Global Features**

### **Multi-language Support**

Support:

- English
  - Hindi
  - Spanish
  - Arabic
  - French
  - Chinese
  - Japanese
  - Bengali
  - Assamese
  - More regional languages
- 

### **Global Time Zone Sync**

- Smart timezone handling
- International scheduling

- Travel mode
- 

## **26. Universal Productivity Modes**

### **Different Modes**

#### **Study Mode**

For students.

#### **Work Mode**

For professionals.

#### **Deep Focus Mode**

For creators and developers.

#### **Family Mode**

For parents.

#### **Health Mode**

For fitness and wellness.

#### **Recovery Mode**

For burnout and stress.

---

## **27. Smart AI Companion**

### **The AI becomes a life assistant.**

Users can ask:

- Plan my week
  - Help me reduce stress
  - Build a gym routine
  - Create a study plan
  - Organize my business tasks
  - Improve my sleep cycle
  - Help me focus
- 

## **28. Cross-Platform Ecosystem**

### **Platforms**

- Android app

- iOS app
  - Web app
  - Desktop app
  - Smartwatch support
  - Tablet support
- 

## **29. Social Ecosystem**

### **Features**

- Team productivity
  - Shared tasks
  - Family groups
  - Study rooms
  - Productivity communities
  - Challenges and competitions
- 

## **30. Mental Wellness Integration**

### **Features**

- Stress tracking
  - Burnout detection
  - Mood journaling
  - Guided breathing
  - Motivation system
  - Positive reinforcement
- 

## **31. AI Automation Features**

### **Smart Automation**

The app can:

- Automatically reschedule missed tasks
- Detect procrastination
- Predict workload
- Suggest ideal focus hours

- Generate routines
  - Create smart checklists
- 

## **32. Business Expansion Potential**

### **Future Products**

- School version
  - Corporate productivity suite
  - Family planner
  - AI coaching assistant
  - Smart wearable ecosystem
- 

## **33. Final Universal Vision**

This app should evolve into:

“A personal operating system for human life.”

Not just a task manager.

But a platform that helps people:

- Organize life
  - Build discipline
  - Improve productivity
  - Maintain health
  - Reduce stress
  - Achieve goals
  - Stay mentally balanced
  - Grow consistently
- 

## **34. Final Summary**

This application is a complete productivity ecosystem for students.

It combines:

- Task management
- Chore tracking
- Focus systems

- Habit building
- AI planning
- Motivation
- Emotional tracking
- Gamification
- Final goal achieving.

into one clean, modern, student-friendly platform.

The goal is to help students:

- Become more disciplined
  - Reduce procrastination
  - Complete daily work consistently
  - Balance academics and life effectively
  - Improve productivity without burnout
-
